Skills

Python(Django, Flask, Falcon), Javascript(React, React Native), AWS(SQS, SNS, Cloud Watch, Cloud Formation, Lambda, DynamoDB, S3, ECS, EC2), Docker, CircleCI, SQL, PostgreSQL.

Experience

Nov 2018 till date
Stylight GmbH, Munich, Germany - *Software Engineer (Backend)*
- Developing microservices for the Product Processing team, including the integration of ML technologies, optimizing colour tagging and image processing.
- Building, deploying, and monitoring software using continuous integration and tools such as Docker and AWS.
- Extensive experience using Git, Flask, PostgreSQL, Redis, AWS, Docker, and CircleCI.

Feb 2017 - Nov 2018
Andela Talent Accelerator, Lagos, Nigeria *- Software Engineer*
As a consultant at Andela, I worked with the following teams:

- **Jetpack, Stanford, USA -** *Fullstack Engineer (remote)*
  - Worked with a team to build the second version of the Jetpack mobile application, including backend features and the UI interface.
  - Worked extensively with Graphql(Graphene-Django, Apollo Graphql), React Native and Django.

- **Cratejoy, Austin, USA -** *Fullstack Engineer (remote)*
  - Improved merchant experience on the Cratejoy platform by squashing bugs, adding new features and maintaining scripts.
  - Worked with Javascript/BackboneJs and Python/Flask.

- **Andela internal team -** *Software Engineer*
  - Worked with a team to build the first version of the Andela Learning Map, an application that maps out your career path according to your current level of proficiency and your aspired level of proficiency.

- ○ Worked with a team that extended the functionality of open source projects such as Reaction Commerce and Cards for Humanity.
- ○ Mentored colleagues and helped them improve their coding and testing skills.
- ○ Built web applications using Python and JavaScript for internal use.

Education

2016 - 2017
University of Lagos, Lagos, Nigeria
MSc Information Technology

2010 - 2014
University of Benin, Edo, Nigeria
BSc Computer Science

Volunteer Experience

Sep 2019 - Jan 2020
Redi School, Munich, Germany - *Volunteer teacher*

I volunteered as one of the Python for Data Analysis teachers for the semester. I was the main teacher for the introduction to Python topics and a co-teacher for the Data Analysis and Machine Learning topics.

April 2016 - June 2017
Hyperion Development, **Johannesburg, South Africa -** *Ambassador*
As an ambassador for Hyperion Dev, my main responsibility was to spread the word about computer science and programming within Nigeria. I did this by heading a team of tech enthusiasts who along with myself, hosted occasions and workshops which introduced people to programming.
